# Final Remarks

Here's a quick summary of the "Architecture of Scalable Applications" module.

**We'll cover the following**

- Summary
- What's next?

Congratulations, you’ve successfully finished the module “Architecture of Scalable Applications.”

## Summary#

Starting off with the different tiers in a software architecture, we learned about microservices and monoliths.

## What’s next?#

It’s time to take a deep dive into the concepts of system design. The next module focuses on system design fundamentals, such as abstraction, non-functional system characteristics, and back-of-the-envelope calculations.
